The Center for Duchenne Muscular Dystrophy
Is Requesting Applications for
Pilot and Feasibility Seed Grants

The Pilot & Feasibility (P&F) Program funds studies in the area of:
skeletal muscle, cardiac muscle or muscular dystrophy research.

This year, two to four new grants will be awarded, each for up to $30,000.

Studies that advance the mission of the CDMD and those which use at least one
Core facility (indicated in the budget) will be given priority.

Scientists and clinicians working on skeletal and cardiac muscle function in
health and disease are encouraged to become members of the Center.

Applications must be submitted by February 9, 2018 at midnight.

Instructions and Information Can Be Found At:
