BE PART OF A MAJOR NEW STUDY ON BRAIN CONNECTIONS ACROSS CHILD DEVELOPMENT

The Lifespan Human Connectome Project Development (HCP-D) Study will enroll 1,300+ healthy children, adolescents, and young adults (ages 5-21) to discover how different parts of a child’s brain are connected and how these connections change as the brain develops.

Who can participate?

- 5-17 year olds and their parents
- 18-21 year olds

What will participants do?

There are 2 study visits. During these visits, you and your child will be asked to:

- Complete interviews
- Questionnaires
- Play iPad games
- Give Saliva
- Undergo a safe non-invasive MRI scan
