CDI Special Research Seminar

Erin Janssen, M.D, Ph.D.
Assistant Professor of Pediatrics
Harvard Medical School
Director, Immune Dysregulation Program
Boston Children’s Hospital

“The role of DOCK8 in the formation of the immune synapse and induction of tolerance”

Tuesday, May 29th, 2018
12:00-1:00 PM
Friedman Boardroom, 12-407 MDCC

Hosted by UCLA Pediatric Allergy, Immunology & Rheumatology

RSVP (required for light lunch)

This series is supported in part by a Catalyst Award from the UCLA Clinical and Translational Science Institute (CTSI; NIH/NICAT grant #UL1TR001881).

The UCLA Children’s Discovery and Innovation (CDI) Institute, established through initial philanthropic funding to UCLA Mattel Children’s Hospital and the Department of Pediatrics at the David Geffen School of Medicine at UCLA, encourages multidisciplinary child health research and research training at UCLA across the spectrum of basic, translational, clinical, and health services research. For more information, including details about seminar updates, please visit the CDI Institute website: www.uclahealth.org/cdi or contact:
