The UCLA Dept. of Neurology
is conducting a research study called:

Early-Onset Alzheimer's Disease Phenotypes:
Neuropsychology and Neural Networks

We are investigating types of Alzheimer’s disease that affect young people
vs. older people and memory vs. other types of thinking (like language)

Eligible participants will be adults that are overall healthy and are willing to commit to a one year follow-up.

Research Study Procedures:

- 2 visits to UCLA at Year 1
- 2 visits to UCLA at Year 2
- MRI scan at Year 1
- Thinking tests and “brain tasks”
