Be Part of the Largest National Study on Brain Development and Child Health at UCLA!

The Adolescent Brain Cognitive Development (ABCD) Study will enroll 10,000+ healthy children and follow them for 10 years from ages 9 to 10 into early adulthood to understand how children’s experiences affect brain development and other aspects of their lives - including academic achievement, social development, and behavioral and overall health.

Receive up to $300 for your time participating in the study. Kids can also get a picture of their brain!

What will participants do?

There are 1-2 visits in the first year. During these visits, you and your child will be asked to complete interviews and questionnaires, play iPad games, give saliva samples, and undergo a safe, non-invasive MRI scan!
