Mitigating Implicit Bias
Join the Conference Viewing Salon

January 23 • 8 am – 1 pm; LSB 2330
January 24 • 8 am – 1 pm; MRL 1-441

Light refreshments will be served! Everybody is welcome.

MITIGATING IMPLICIT BIAS; "VIEWING SALON"
Alicia Izquierdo (Psychology) has co-organized this virtual conference together with the Society for Neuroscience (SfN). Given online viewing restrictions for non-members, the BRI is inviting the UCLA community to watch this Conference together with your colleagues.

We all have learned stereotypes that unconsciously influence how we see ourselves and others. Like perceptual illusions, some biases persist even once we are aware of them. Implicit bias impacts diverse scientific communities, ultimately limiting the potential of neuroscientists and inhibiting discovery.

The conference features a diverse panel of experts (e.g. Ketema Paul; Integrative Biology and Behavior, Kimberly Crenshaw; Law) to gain greater understanding and recognition of stereotypes that unconsciously influence how we see ourselves and others. Obtaining these tools will help you be aware of and manage implicit bias at UCLA and beyond. The tools will help you with the relevant sections when preparing your next promotion dossier or grant application.

KEY TOPICS:
• Implicit Bias in Academia
• Creating a Good Environment
• Social Dynamics
• Resources for Non-Biased Recruitment, Selection and Evaluation.
• Impact of Implicit Gender Assumptions
• Successful Practices in Promoting Diversity
• Negotiation
• Mentoring in light of implicit biases
• Diversifying the pipeline

MORE INFORMATION:
• Detail of Schedule: Neuronline.SfN.org/pdc2018vc
• You are invited to view all or any part of the sessions
• No need to register, just come, have coffee and learn!
