Having a PhD is necessary for career advancement in the biomedical sciences. Therefore, PhD admissions acts as the de facto gatekeeper for scientific leadership; however, the process has remained largely unchanged for decades. In this seminar, we will discuss data leading to many biomedical programs recently dropping the GRE requirement. In addition, we will discuss practical tips for reducing bias during the admissions process and why this is important.

Monday, March 18th 2019
Hershey Hall Grand Salon
4 P.M.
Reception to Follow
