Do You Suspect That Your Child May Have ADHD?

UCLA Semel Institute for Neuroscience and Human Behavior

Investigators:
Jennifer Levitt, MD
Mary O’Connor, PhD

• Is your child considered very active?
• Does your child have a hard time paying attention?

If you answered YES to either of these questions and your child is 8 to 13 years old, we would like to invite him/her to participate in a study at UCLA.

This study involves:
• One MRI brain scan. MRI is safe and does not use radiation.
• Cognitive assessments + diagnostic interviews

$100 compensation is provided for time + travel to participate in this study.
