Cognitive Function and Brain Structure Research Study

Do you have a child between 6-17?

Participants will serve as healthy comparison subjects for a study investigating brain structure and function in individuals with genetic disorders. Study procedures for eligible participants include an MRI brain scan, clinical interview, tests of memory and attention, hair and blood/saliva sample, and review of medical records.

• There will be three visits in total (one/year for three years) and each visit can be completed in one day.

• Participants will receive up to $260 for completion of all study visits and procedures.

For more information:
Please call Leila Kushan at (310) 825-3458 or email beardenlab.ucla@gmail.com

A confidential phone screen will be conducted to determine your initial eligibility. (Individuals under 18 must have their parents call.)

Principal Investigator: Carrie Bearden, Ph.D. cbearden@mednet.ucla.edu
