VESTIBULODYNIA RESEARCH: FEASIBILITY STUDY

Seeking FEMALE VOLUNTEERS AGES 18+

Volunteers do NOT need to have vestibulodynia

This is a pilot study to optimize and standardize research protocols that will be used in a subsequent study that will evaluate treatments for women that have vaginal pain with tampon use or intercourse.

Participation includes:

- One 2-hour visit at UCLA
- Physical exam, blood test, & questionnaires
- Compensation for time and effort

For more information about participating, please contact:
