Healthy Volunteers Wanted for Research

Volunteer for medically-supervised research at the UCLA Center for Human Nutrition to study "Effects of pomegranate juice consumption on the health of mothers and infants during breastfeeding"

YOU MAY BE ELIGIBLE IF YOU ARE:
- Mothers exclusively nursing their infant child
- Infant child must be full-term, born vaginally, up to 6 months of age
- Mother and child in generally good health

Your participation will last 4½ weeks (including screen). There will be 6 clinic visits (3 visits to drop off collections + 3 clinic visits). Procedures include a collection of breast milk and blood (mother only), urine and stool (mother and child).

You will be paid up to $375 for your participation.
