LEARNING OBJECTIVES:

1. To gain familiarity with the concept of syndromic neurodevelopmental disorders and how these individuals may have distinct features from the broader NDD spectrum.
2. To recognize the major challenges in clinical trial design in neurodevelopmental disorders, especially those that involve more severe intellectual disability and other comorbidities.
3. To understand the concept of "precision therapies" and become familiar with a few examples of precision therapies in syndromic neurodevelopmental disorders.

Monday April 20th, 2020
11:30AM – 12:30PM, PST

Location: via Zoom
https://uclahs.zoom.us/j/390312752
Dial +1 669 900 6833 (US, PST)
Meeting ID: 390 312 752

All are welcome!
No RSVP is required.
