VOLUNTEERS WITH LIVER DISORDERS NEEDED FOR RADIOLOGY MRI STUDY

We invite you to participate in Dr. Holden Wu’s clinical research project in Radiological Sciences to evaluate MRI techniques for imaging the human body.

You may be eligible for the study if you have been told by a doctor that you have a liver disorder such as fatty liver, cirrhosis, or liver tumor. If you qualify for the study, you will have an MRI scan lasting up to 1 hour to help researchers evaluate cutting edge MRI techniques.

There is no fee to participate in the study, and you may be eligible to receive a $50 gift card and a parking voucher for your participation. If you are interested in participating in our MRI research program, please contact:

Tammy Graham, RN at 310-794-9202 or tfloore@mednet.ucla.edu
