Iain McGregor, Ph.D., is a professor of psychopharmacology and the Academic Director of the Lambert Initiative for Cannabinoid Therapeutics in the Brain and Mind Centre at The University of Sydney. The Lambert Initiative aims to fast-track research on the therapeutic benefits of cannabinoids in various medical disorders, including epilepsy, chronic pain, cancer, addiction, and mental health conditions. Other recent research has focused on the effects of cannabis on driving and the potential impact of cannabidiol (CBD) on exercise and sporting performance. The Lambert Initiative is also engaged at a social and political level to enhance community and professional education around medicinal cannabis and improve patient access to high-quality products.
