THE IMPOWER-024 CLINICAL STUDY
Researching Once-a-Month PrEP in Men and Transgender Women.

This study is testing an investigational monthly pill that may lower the chances of getting HIV-1.

You may qualify for this study if you are between 18-29 years old and:

- Are a cisgender male (male at birth) or a transgender female
- Are sexually active with cisgender male or transgender female partners
- Are considered at high risk for acquiring HIV-1 infection

Additional requirements apply, which the study doctor will discuss with you.
Everyone who takes part in this study will have their health closely monitored by an experienced HIV study team.

You will be in the study for up to 2.5 years.

You will visit the study center for tests 26 times.

You will talk to the study staff by phone 2 times.

For more information, including possible risks and benefits of being in this study, please contact:

The UCLA study team at
(310) 843-2015 or CAREoutreach@mednet.ucla.edu*
