New Study Seeks Healthy Volunteers between 18 and 55 Years

This research study takes place at the UCLA Ahmanson-Lovelace Brain Mapping Center (ALBMC). The goal of this research study is to understand the effect of transcranial Direct Current Stimulation (tDCS) on the human brain using Magnetic Resonance Imaging (MRI). Participation involves two visits at the UCLA ALBMC, and total time including all visits will not exceed 3 hours. Participants will be compensated for parking, and will receive $20 for the first visit, and $55 upon completion of the second visit.
