Imaging Study: Chronic Low Back Pain with Failed Prior Spinal Cord Stimulation

The UCLA Neurosurgery invites you to participate in an imaging study that investigates the biomarkers and connectivity in chronic low back pain patients who failed the spinal cord stimulation trial and in healthy subjects.

We are seeking participants:

- Ages 50-74
- Medically refractory chronic low back pain patients that failed prior spinal cord stimulation (SCS) or Healthy subjects

Study participation consists of:

- One visit for MRI
- **Questionnaires:** Visual Analog Scale (VAS), Pain Anxiety Symptom Scale (PASS), Short-Form 36 (SF-36), European Quality of Life Five Dimension (EQ-5D), Montreal Cognitive Assessment (MoCA), Hamilton Depression Rating Scale (HAM-D), Oswestry Disability Index (ODI), McGill Pain Questionnaire (MPQ), PROMIS Assessments, NIH Toolbox Assessments

Study benefit:

- $75 gift card upon completion
- UCLA parking voucher
