RESEARCH FOCUSED ON ARMS AND HANDS

HELP ADVANCE RESEARCH TO BENEFIT CURRENT AND FUTURE PERSONS WITH STROKE

WHAT IS THIS STUDY ABOUT?

Steven C. Cramer, M.D., a Professor of Neurology at UCLA, is developing tools to measure how the brain senses movement. The long-term goal is to use this information to better understand how to help people recover after a stroke.

WHY PARTICIPATE?

- You may help in developing new therapies for people who suffer a stroke.
- You will be compensated $40 upon completion of testing.

WHO CAN PARTICIPATE?

- People 18 years or older.
- Must be able to complete up to two visits at the clinic.

HOW CAN I PARTICIPATE?

- Call (424) 522-7874
- Or email cramerlab@mednet.ucla.edu for more information

All study activities are non-invasive. You will be asked to answer questions plus do puzzles and simple tests that involve moving your arms and hands. All research is conducted through the University of California, Los Angeles.
